

## **Trainings and Speaking Engagements (Comprehensive List)**

The entries below reflect invited presentations, professional trainings, and continuing education delivered for legal, clinical, healthcare, and public-sector audiences. Topics include family-law-adjacent psychological issues (high-conflict family dynamics, domestic violence and coercive control, parent-child contact problems) and crisis systems work (suicide risk assessment, emergency psychiatry, de-escalation, and disaster response). Entries are listed in reverse chronological order; repeated titles reflect delivery across multiple venues and years.
